Mike:

Please find the attached Excel file where staff have summarized data in response to your questions. The information is copied below.

Summary	Count	%
% of Wells that have sub-3000 mg/L TDS	176	33%
% of Wells that have 3000-10000 mg/L TDS	279	52%
% of Wells that have no TDS data (as of 1/22/15 1:30 PM)	48	9%
% of Wells that have TDS >= 10000 mg/L	29	5%
Total	532	100%

There are 43 wells that did not report any injection.

Our database is limited for well depth information. The attached indicates a range of depths

based in the Top and Bottom Perf and True Vertical Depth data. These fields in the database have a lot of blanks (no entries).

Please let me know if you have any questions.

Thanks,

Rob
